

Data Engineer - Managed Service / Support Team

Permanent

UK/Home based - no visa sponsorship available.

About Inawisdom:

Inawisdom is a leader in Artificial Intelligence (AI) and Machine Learning (ML) and specialist in advanced analytics, BI/MI and Data Science.

We are an exciting and rapidly growing AWS and Data consultancy. As an Amazon Web Services (AWS) Premier Partner and having been awarded the AWS ML Partner of the Year 2020, we are extremely well positioned at the forefront of this fast-paced, cutting-edge technology space.

Role:

I am looking for mid-level Data Engineers to come and work with an extremely advanced team of Data Consultants, Data Engineers, Data Architects and Technical Consultants. We design, build and implement complex and cutting-edge Data Solutions for our FTSE 250 and FTSE 100 Customers.

I am looking for a dedicated Data Engineering Support Consultant, providing a first-class service to our Managed Service accounts. You will resolve tickets and incidents reported on our solutions.

Ideally you will have:

- 2-5 years SQL and data manipulation experience
- the basics of AWS and its Data Services and/ or other Cloud Data Services experience (Azure or GCP for example)
- Python experience would be a bonus, as would any ETL tooling experience (Glue, Matillion, Data Bricks, Talend, Informatica etc)
- You may have 2-5 years commercial experience in a data related role.
- You will be looking to gain knowledge and experience and forge ahead in your career as a Data Engineer working with the latest tech.

Character traits:

- Thrives in a fast-changing environment, handling many different problems
- Able to investigate issues and communicate status and resolution plans in clear way
- Ability to quickly understand different technologies to build a picture of the problems
- Able to work alone and own the resolution of issues, escalating to the wider teams for more in-depth knowledge as required
- Understand monitoring and alerting of data solutions and recommend improvements to operations
- Has a very inquisitive mindset and can quickly learn enough about a technology to understand it enough to resolve issues
- Able to work in a structured manner using support desk queue keeping incidents updated

Great benefits on offer, a positive and collaborative learning environment, great tech, great customers, small teams of experts, good coffee, regular socials, plenty of support.

This is a fantastic opportunity to join one of the UK's leading Data Consultancies.
